

Philosophers Summer Term 1 – Europe

Overview, Vocabulary and Sticky Knowledge

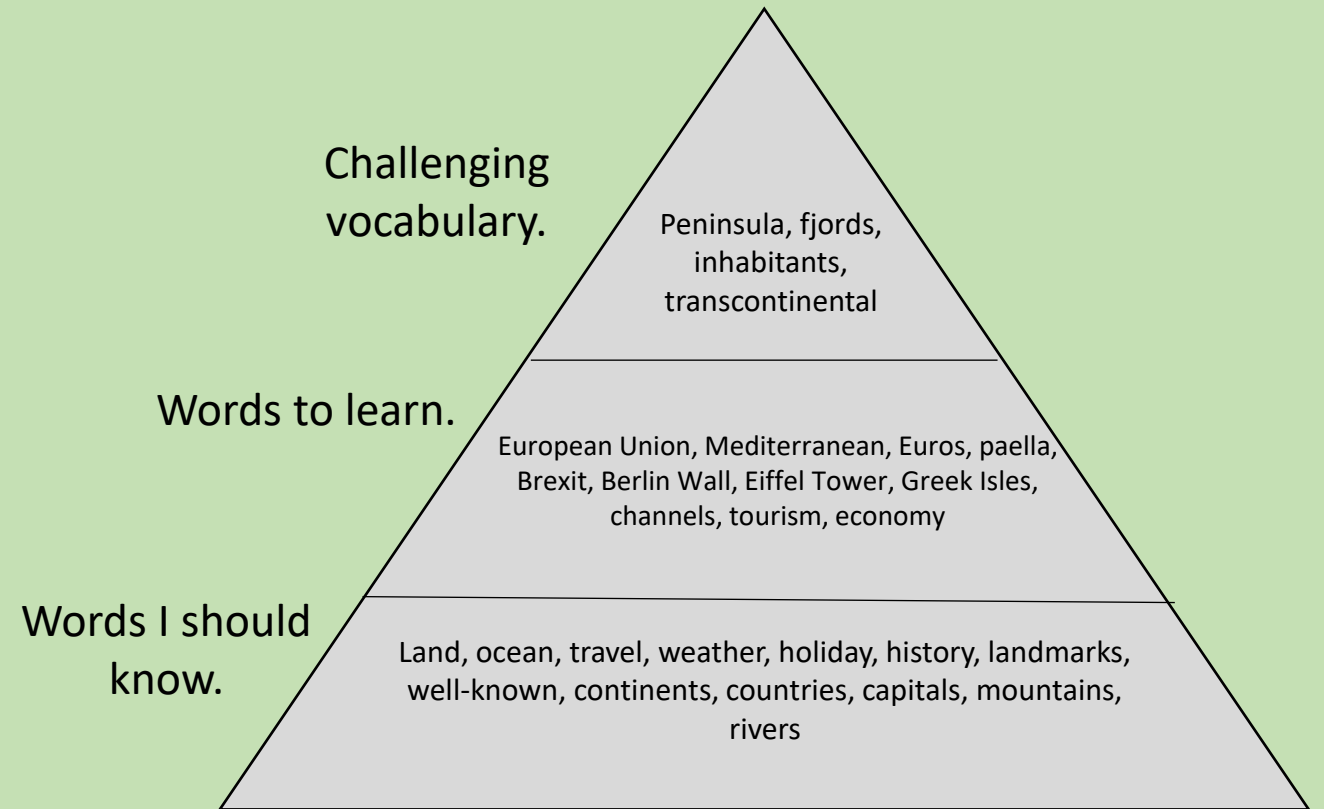

What do I already know about Europe?

In Explorers, I learned...

- **The temperature of the United Kingdom is generally cool. The most common weather is rain.** (Up, Up and Away)
- We record the temperature using a thermometer. (Up, Up and Away)
- Weather can vary around the world. In the North and South Pole, it is much colder than at the equator. Countries which are at the equator have a hotter climate. (Up, Up and Away)
- **A compass has four points; North, East, South, West. (All around us)**
- **London is the capital city of England. (Fire, Fire)**

Key Vocabulary:

Topic Traveller Question:

What can we explore in Europe?

Answer this question in a creative way and bring into school at the end of this half term.

Sticky Knowledge:
