

# Explorers Spring Term 1 – Up, up & Away!

## Overview, Vocabulary and Sticky Knowledge

### What do I already know?

In Little Explorers I learned...

- We have 5 senses. These are touch, hearing, smell, tasting and sight.
- Where an animal lives is called a habitat. Some habitats are being destroyed and we should try to help the animals survive.
- Homes around the world can be very different. This is because people have access to different materials and because the weather can very different.

### What will I learn now?

- Different types of weather and how to measure it.
- Why different regions have different weather and climate.
- Why weather is important for growing crops and the way people live.
- Where different places have extreme weather.

### Key Vocabulary

Challenging vocabulary.

Words to learn.

Words I should understand.

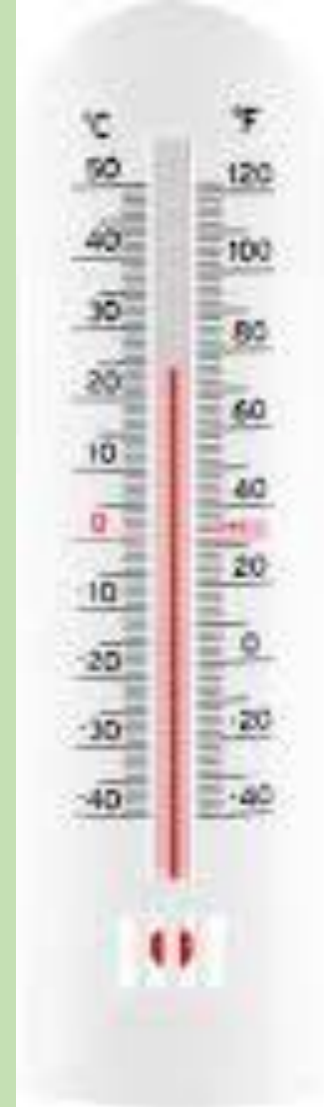

drought  
temperature  
climate  
prediction  
record  
observations

thunder hail cloudy sleet  
equator forecast  
seasons flood heat  
North / South pole  
blizzard hurricane  
tornado heatwave  
thermometer waterproof dail  
y collect extreme rain guage

wind rain rainbow sun snow ice  
Autumn Spring Summer Winter past  
weather

# Sticky Knowledge:

- The temperature of the United Kingdom is generally cool. The most common weather is rain.
- We record the temperature using a thermometer.
- We have four seasons in the United Kingdom: Spring, Summer, Autumn and Winter.
- In winter, it is often the coldest season, summer is the warmest season.
- Sometimes we can have extreme weather in The United Kingdom. When we have a lot of rain, it can cause a flood.
- Weather can vary around the world. In the North and South Pole, it is much colder than at the equator. Countries which are at the equator have a hotter climate.
- The weather can affect the things we do. If it is rainy, we wear waterproof clothes. When it is sunny, we should wear a hat and suncream to protect ourselves from the sun.

This is a thermometer. You can use this to find out the temperature.
